### ***Scope of Review***

We conducted our review in accordance with the International Standard on Review Engagements 2410, "*Review of Interim Financial Information Performed by the Independent Auditor of the Entity*". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. The above guarantees were issued in the normal course of business. The Company, in common with the significant majority of insurers, is subject to litigation in the normal course of its business. **21 Financial instruments**

The fair values of financial assets are determined using similar valuation techniques and assumptions as used in the audited annual financial statements for the year ended 31 December 2024.

Financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable.

Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The following table gives information about how the fair values of these financial assets are determined:

| Financial assets         | Fair value as at                        |                                      | Fair value hierarchy | Valuation techniques and key inputs   | Significant unobservable input | Relationship of unobservable inputs to fair value |
