

Press Release

ELIPS achieves exceptional performance in 2025 and continues to strengthen its regional leadership as a major supplier of insulated pipes.

Dubai, UAE, 6 April 2026: Empower Insulated Pipe Systems (ELIPS), a fully owned subsidiary of Emirates Central Cooling Systems Corporation PJSC (Empower), and a leading manufacturer of innovative thermal solutions and insulated pipes systems, continues to strengthen its position as one of the region's leading providers of insulated pipe solutions, driven by strong operational performance in 2025, and exceptional growth momentum that continued into the first quarter of 2026.

During 2025, ELIPS continued its pivotal role in supporting critical infrastructure projects in the UAE and regional markets by delivering and executing a wide range of high-quality insulated pipes and projects. Alongside enhancing the efficiency of its production and operational processes, it strengthened its ability to meet the growing demand for high-efficiency, sustainable infrastructure solutions.

The year also witnessed the addition of more than 30 new vital projects to the company's business portfolio, bringing the total number of projects delivered by ELIPS since its establishment to 282, affirming its presence across regional markets and strengthening its position as a leading provider of insulated piping solutions and fittings.

The total length of piping systems produced and delivered by ELIPS has also risen to over 950 kilometres, including 50 kilometres delivered in 2025, reflecting continued growth in its production capabilities and its ability to meet rising market demand.

On the customer front, ELIPS continued to expand its regional and international reach, growing its client base to more than 340 local and international customers following the addition of approximately 40 new clients during 2025, reflecting the growing confidence in the company's solutions across various sectors. The year 2025 marked a significant milestone in the company's success journey, contributing to strengthening its leading position and building a strong business base that laid the foundation for securing dozens of contracts for major flagship projects during the first quarter of 2026, reaffirming the strength of its business line and the continuity of demand.

ELIPS maintains a strong regional presence in key markets, including the UAE, Qatar, Kuwait, Oman, Bahrain, and Egypt, where it has established itself as a key regional player, building on a growing portfolio of projects and long-term strategic partnerships.

Together, these achievements reflect ELIPS' strong presence in the insulated piping sector and reinforce its position as a leading, trusted provider of sustainable infrastructure solutions and as a strategic partner in supporting urban development projects in the UAE and the region.

“ELIPS’s performance in 2025 reflects the efficiency of its business model and its success in strengthening its position as a leading provider of insulated pipe solutions that support various vital sectors. This sustained growth underscores the company's ability to meet the requirements of diverse projects and keep pace with the rapid expansion of infrastructure projects at both the local and regional levels,” said **H.E. Ahmad bin Shafar, Chairman of ELIPS.**

“Over 17 years of operation, ELIPS has continued to enhance its operational and production capabilities, supporting its expansion plans in regional markets, and strengthening its role in developing sustainable infrastructure that meets the needs of various sectors, in line with the comprehensive development aspirations across the region,” **bin Shafar** added.
